## Expedia Corporation Selects Star Analytics' Star Integration Server (SIS)

*SIS is a Key Component of Expedia's Financial Reporting*

**Palo Alto, CA, June 30<sup>th</sup>, 2006:** Star Analytics, Inc. announces that [Expedia, Inc.](http://www.expedia.com) (NSDQ:EXPE), the leading online travel site, has selected the latest version of Star Analytics' Star Integration Server (SIS) as an integral part of their corporate reporting, using the [Hyperion](http://www.hyperion.com) (NSDQ:HYSL) Business Performance Management Suite of applications.

According to Stephanie Van Eyk, Senior Financial Manager at Expedia in Bellvue, WA, "Star Integration Server is the only way we could efficiently integrate our Hyperion application data with our corporate reporting systems. SIS was an obvious and effective solution to a very difficult problem for us."

Expedia currently has dozens of users worldwide using the Hyperion BPM suite, and many more leveraging the capabilities of SIS to extract data from their Hyperion BPM applications and other financial systems. SIS allows Expedia to seamlessly, reliably, and automatically

## Logitech Selects Star Analytics' SIS (page 2)

share data between Hyperion Planning™ or Hyperion Essbase™, and reporting applications such as Hyperion Intelligence™ and Expedia's data warehouse.

"We've invested a lot of effort in our Hyperion data, and it's critical to running the company", says Van Eyk. "Using SIS makes it possible for our financial users to report against that data rapidly and effectively."

### About Star Analytics

Star Analytics, Inc., a privately held corporation, is a premier provider of software automation products and solutions that enable companies to use the Hyperion Business Performance Management suite of products more effectively. Star has solved the challenge of sharing Hyperion BPM data with other databases and reporting applications, allowing Hyperion users to unlock the power of their financial systems, extending the use and availability of Hyperion data, essential for real-time planning, uninterrupted applications availability, and strategic reporting.
